

**CUSTOMER'S STATEMENT**  
**The Control of Explosives Precursors and Poisons Regulations 2023**

TO WHOM IT MAY CONCERN,

From the 1 st of October 2023 businesses supplying regulated explosive precursor products to professional users and other businesses are required to take additional steps to verify that they are legitimate businesses and users.

In this regard we are asking those businesses we supply to complete a customer statement and provide us with the necessary information which will allow us to continue to provide you with those products. These statements are valid for 18 months for those products that have been included in the statement.

Further guidance can be found at:
